Tail Message / Station Message

/etc/asterisk/local/

Add a folder /StationMSG

Then make an audio file with Audacity and add it to this folder

e.g. tailmsg.ulaw

/etc/asterisk/rpt.conf

Scroll down till you see ; TAIL MESSAGE and remove the **;** from the fallowing lines.

;tailmessagetime=5400000
; Play a tail message every 90 mins
;tailsquashedtime=300000
; If squashed by another user,
; try again after 5 mins
;tailmessagelist=/etc/asterisk/local/StationMSG/tailmsg
; list of messages to be played for tail message

You can add more messages just by adding it to the string and it will cycle through them.

e.g. tailmessagelist=/etc/asterisk/local/StationMSG/tailmsg,/root/nameofsecondfile
